	DATE	EXMR
<p>Clarification of the record: On 4/20/07, the Examiner discussed the application in detail with a member of QAS. The Examiner asked that the application history and the pending claims be reviewed and the Examiner be advised on how to examine the claims and respond to Applicant's remarks. After the file was reviewed, it was suggested that the Examiner withdraw the 112, first paragraph, rejection because of Applicant's amended submitted 9/27/99. Also, it was suggested that the after phrase 'R26 is a linker' Applicant inserts 'a capase cleavable peptide' into claim 22 to avoid ambiguity of the claims. in addition, it was brought to the Examiner's attention that amending claim 22 as suggested by the QAS member would limit the type of peptide that is attached to the metal, chelator, linker composition and if the specific combination is not found by the Examiner, the claims would be allowable over the prior art of record. The Examiner did as advised.</p>	4/20/2007	DJ
